

Family Education: Experiencing Dementia

**Dementia affects everyone, including people, families and communities.
The Alzheimer Society of Manitoba can help!**

Experiencing Dementia unites people diagnosed with early stage dementia, family members and caregivers for a unique learning opportunity. Our dementia care specialists will help you understand:

- The changes in the brain and the impact on behaviours
- The disease progression
- The value of respite and community resources
- Considerations for future planning
- Skill building techniques designed to prolong independence and safety
- Self health tips for caregivers

Begins: February 17, 2016

Ends: April 6, 2016

Register today, space is limited!

8-week Classroom Program

Wednesdays beginning February 17
10 am to 11:30 am

Alzheimer Society of Manitoba

At the completion of the eight-week program, participants are encouraged to join a support group for people with dementia or a family support group.

Alzheimer Society of Manitoba
10-120 Donald St
Winnipeg, Manitoba
