

Alzheimer's Disease Caregivers Needed!

Caring for a person living with Alzheimer's disease can be a challenging task. There are assistive technologies to help people with Alzheimer's and their caregivers; however, many of these are not very useful. We are looking to understand what the needs are of people with Alzheimer's disease and their caregivers and what would make technologies more useful to them.

You are being asked to share your experiences regarding using technology while caring for someone with Alzheimer's through a questionnaire.

The questionnaire should take about 30 minutes to complete.

We are looking for people who:

- provide at least 7 hours/week of unpaid care to a person with Alzheimer's,
- be able to communicate, read and write fluently in English, and
- are not a formally trained caregiver (e.g. registered nurse)

You can complete the questionnaire online at www.iatslsurvey.org

or via mail, phone, or in person by calling Bing at (416) 597-3422 Ext: 7910 or 1-888-220-0280
